Veller

- **Problem Definition**

Veller is a website gathering articles (posts) about cultural and educational stuff; scholarships, internships, contests...etc. Organizations that have something to offer make an account on the website to post about their opportunities. Applicants sign up to apply for these opportunities.

- **Users**

1. **Applicants** (undergraduate student or graduates)
2. **Organizations** (university, company, volunteering organization or a travel agency)
3. **Supervisors**
4. **Admins**

- **Privileges**

1. **Applicant**

- He can apply to a scholarship, contests, internship, exchange programs or volunteering programs.
- He can add his own information to the website like skills, experience...etc.
- He can contact organizations asking for details about opportunities they are offering.
- He can contact supervisors via support tickets.
- He can search on the website for opportunities that fits him.

2. **Organization**

- It can offer scholarship, exchange programs, volunteering program, internship, or a contest.
- It can view, approve or reject applicants' applications.

- It can modify and add its own info to the website like industry, departments...etc.
- It can search for applicants that fit their requirements.
- It can contact supervisors via support tickets.

3. Supervisor

- He can review applicants and organizations profiles.
- He can help other users via support tickets.
- He can review posted opportunities and approve them to appear on the website.
- He can ban other users if they didn't follow the website rules.

4. Admins

- They assign the supervisors of the website
- They have the source code of the website
- They update the website from coders side
- They can add or remove supervisors of the website

• Entities

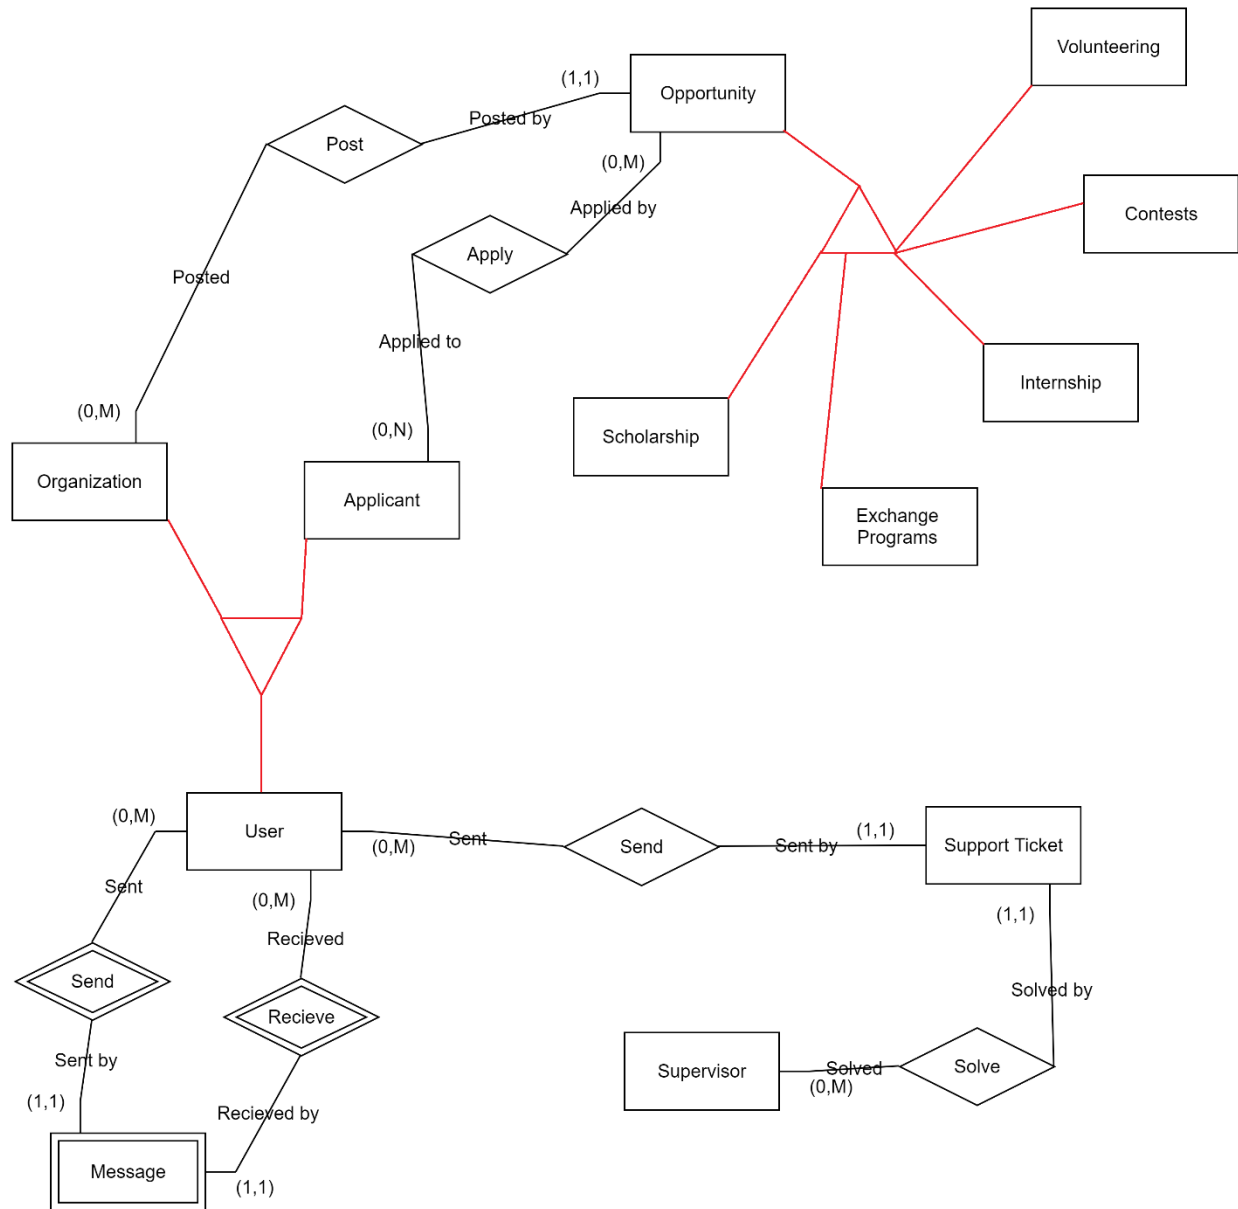

1. Opportunity (Super-entity for all posts on website)
2. Scholarships (sub-entity for Opportunity)
3. Internships (sub-entity for Opportunity)
4. Contests (sub-entity for Opportunity)
5. Volunteering (sub-entity for Opportunity)
6. Exchange programs (sub-entity for Opportunity)
7. User account (Super entity for all users on database)
 - a. Applicant (Users who applies in opportunities, sub-entity)
 - b. Organization (Users who post opportunities, sub-entity)
 - c. Supervisor (Users that supervise posts & answer support tickets, sub-entity)
8. Message
9. Support tickets

- **Relationships**

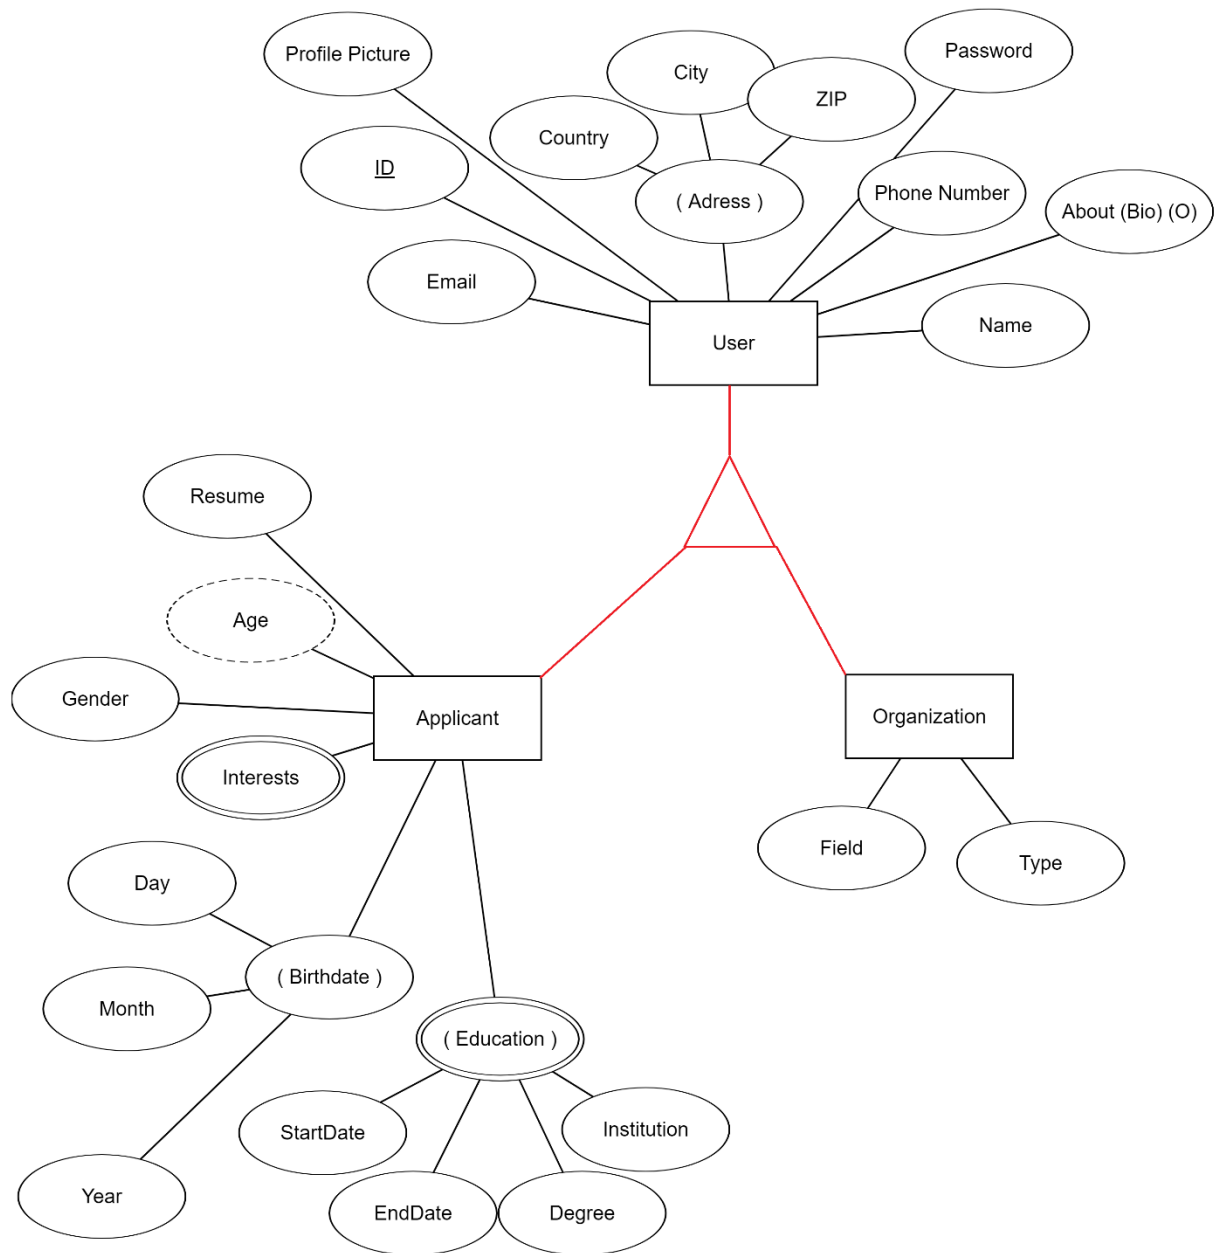

- An organization posts an opportunity
 - It's a one-to-many relation as one organization can post multiple opportunities, but only one organization can post opportunity with a unique ID.
- An applicant applies for opportunities
 - It's a many-to-many relation as multiple applicants can apply for same opportunities and multiple opportunities can be taken by same applicant.
- An organization sends or receives messages
 - It's a one-to-many relation as one organization can send multiple messages, but only one message could be sent or received by a certain organization.
- An applicant sends or receives messages
 - It's a one-to-many relation as one applicant can send multiple messages, but only one message could be sent or received by a certain applicant.
- An organization sends support tickets
 - It's a one-to-many relation as one organization can send multiple support tickets, but the support ticket could be sent by a certain organization.
- An applicant sends support tickets
 - It's a one-to-many relation as one applicant can send multiple support tickets, but the support ticket could be sent by a certain applicant.

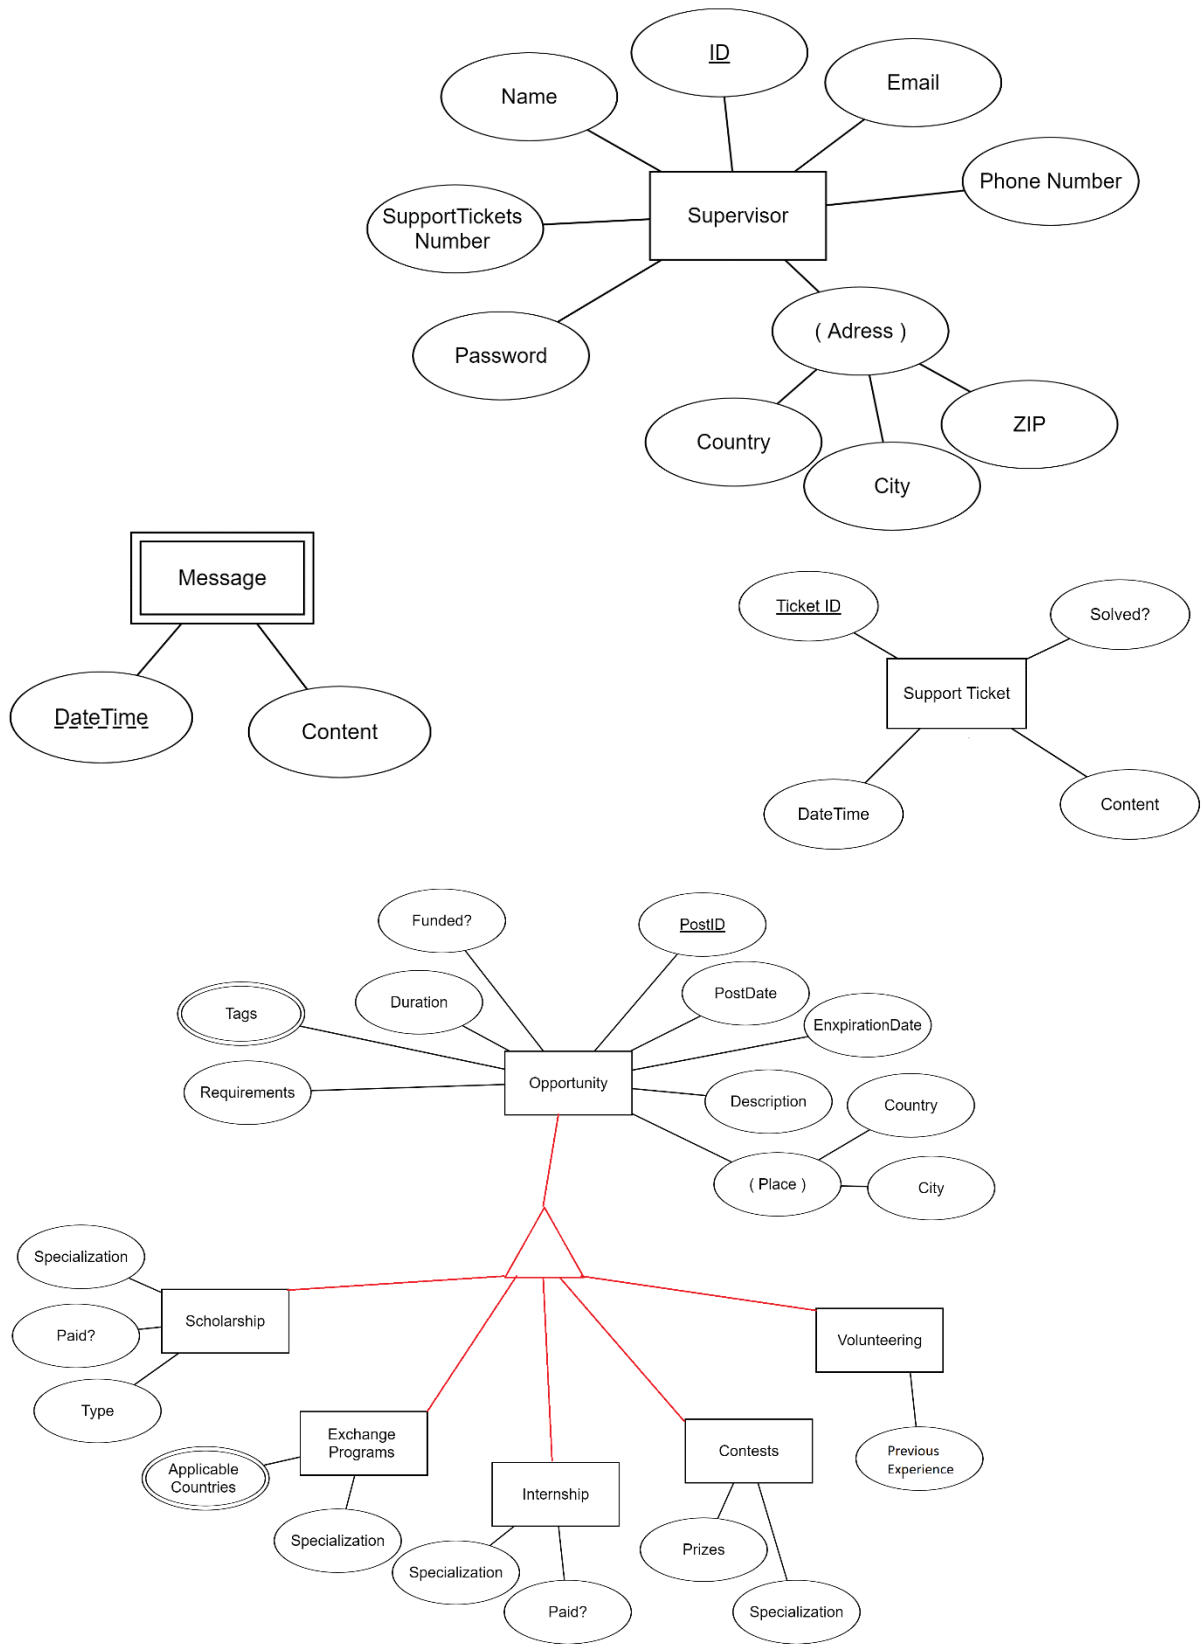

- Supervisor solves the problems mentioned in the support tickets
 - It's a one-to-many relation, as the supervisor can solve multiple problems mentioned in multiple support tickets, but the support tickets could be handled by only one supervisor.

Relations ERD

Entity-Attributes ERD

- **Restrictions**

1. Birthdate of applicants have year 2000- not higher
2. Password must be 8 digits at least
3. Any attribute with name ending with “?” means it is a Boolean value; true or false, yes or not. Except for “Funded” it should be one of three values; fully-funded, partially-funded or not-funded.
